

What ever happened to ?true? free enterprise? The people at XM radio provide an alternative to ?ad? driven broadcasting. I prefer to pay for ?just the facts of weather and traffic reports? rather than ?the commercialized weather and traffic reports? of free radio. The subscribers of XM radio are sending a clear signal to ?free radio station operators and broadcasters? that we don?t want the commercials! That?s why ?we? the subscribers are paying for XM. I was unaware that weather and traffic had a trademark or copyright as to who can report it. Who controls or pays Mother Nature for creating the weather and who pays me and every other commuter for contributing to the traffic?

If you pass this, what ever you want to call it, you are taking away my ?freedom of choice?. I?m an American with the right to choose what I want to listen to and ?I? choose to pay for radio without commercials.

There is enough people spending money in United States for every body to make a buck. This movement by ?free radio and broadcasters? I feel is driven by pure ?GREED?!!!!

Furthermore, I feel the FCC should be spending my tax dollars on tracking down terrorist communications rather than wasting their time and my hard earned money on issues like this. What is going on??

XM has a good thing going, please leave it alone.

Thank you for reading,
